FORECAST-BASED REPLENISHMENT TRANSFORMS DIGITAL KANBAN LEADER DATACRAFT SOLUTIONS

DURHAM, NC - Datacraft Solutions (www.datacraftsolutions.com) delivers a revolutionary digital kanban process of automation solutions to lean manufacturers through a secure Internet gateway, eliminating the need to install and maintain a complex IT infrastructure. The company has experienced significant growth in the past two years by eliminating complicated, expensive, time-intensive software implementations as well as extensive training regimens and the need for internal support. Datacraft Solutions' replenishment supply chain digital kanban system allows customers to access and utilize powerful lean benefits immediately for a low, predictable monthly fee. Services are scalable so manufacturers can design an appropriate digital kanban solution.

Almost every Datacraft Solutions client has some component of their stuffs that has volatile or infrequent demand where they prefer to drive replenishment off of production prognoses or agendas rather than current uptake.

Datacraft Solutions' Provider Replenishment is planned to aid makers to digitally pull off all word forms of material replenishment with suppliers. This ware combines Datacraft Solutions' leading Digital Kanban capabilities with characteristics that let makers refill materials with purchase orders founded on prognoses or production agendas. Datacraft Solutions' Provider Replenishment furnishes both makers and suppliers a single net portal where they can consider prognoses and kanban signs, release purchase orders, course orders and pull off receptions. Datacraft Solutions' Provider Replenishment is planned to get rid of stock-outs and the resulting expedited bringings to cut stock list grades by up to 75 percent while streamlining procedures and dramatically increasing empor and deviser productiveness.

Datacraft Solutions' Provider Replenishment widens Datacraft Solutions' Digital Kanban application by allowing clients to have one replenishment interface with their suppliers, regardless of the material type. Datacraft Solutions' Provider Replenishment furnishes emptors and suppliers with a single, integrated replenishment interface that shows the position for every order in the scheme, both kanban and non-kanban. Highlights of the scheme include:

- Systematically prints calculated, be altered orders and alteration orders founded on demand alterations.
- Automates and streamlines ordering procedures.
- Provides suppliers an environment to accept, do alterations and join forces in the purchase order capital punishment.
- Courses orders with suppliers while they are in procedure and in theodolite.
- Provides suppliers with standardized transport labels with barcodes, eliminating data entry during receiving.
- Consistently rides herd on provider public presentation.

Datacraft Solutions' Provider Replenishment meliorates collaboration with suppliers and does away with confusion, double orders and lost orders by providing emptors and suppliers with clear and visible replenishment positions for every order in the scheme.

Datacraft Solutions, the existing leader in angle manufacturing package, mentioned that its flagship ware, Signum Digital Kanban, is planned to aid makers cut stock list by up to 75% while eliminating stock-outs. This only true digital kanban solution lets store flooring operators pull off and course all material, as well as constituents that are directed to outside processors. This critical ware characteristic lets makers attain additional stock list decreases and fewer stock-outs, using a single integrated set of material replenishment procedures for all merchandises.
