TORONTO AME EVENT TO INCLUDE DATACRAFT SOLUTIONS

DURHAM, NC - Datacraft Solutions will participate as a sponsor, exhibitor and attendee in the next AME conference, titled, "From Good to Great" to be held on October 20 -24 in Toronto Canada. That show will focus on the fact that manufacturing is at a crossroads in North America. According to the AME, "Our future lies in taking action and learning how to go from good to great. We need to engage in battle with mediocrity. Thousands of our industry colleagues are excelling in this global marketplace because they're going beyond the norm. They have learned the secret that disciplined people, thinking disciplined thoughts, taking disciplined action is the winning combination you need to succeed."

The Fall AME Conference will also feature seventy powerful, practical presentations delivered by industry peers who are coming to exchange, learn and grow by networking with attendees and lean teams. Each presenter has been selected from hundreds of submissions. The presenters are coming to Toronto to share their passion about what worked, what did not work and how they got to where they are now. Hear from companies like: Steelcase, Polycon Industries, United Airlines, Ventana, Thomas & Betts, Interface, Columbia Plastics, Northrop Grumman Shipbuilding, Loewen Windows, ThedaCare and Caterpillar.

According to Stephen Parker, CEO of Datacraft Solutions, "We are always excited about the learning that takes place at an AME Conference. Datacraft Solutions looks forward to contributing to future AME conferences as speakers, sponsors, exhibitors and attendees."

Datacraft Solutions (www.datacraftsolutions.com) delivers a revolutionary digital kanban process of automation solutions to lean manufacturers through a secure Internet gateway, eliminating the need to install and maintain a complex IT infrastructure. The company has experienced significant growth in the past two years by eliminating complicated, expensive, time-intensive software implementations as well as extensive training regimens and the need for internal support. Datacraft Solutions' replenishment supply chain digital kanban system allows customers to access and utilize powerful lean benefits immediately for a low, predictable monthly fee. Services are scalable so manufacturers can design an appropriate digital kanban solution.
